

## **NERVE PAIN GONE**

We were very skeptical about trying the BLUSHIELD EMF protective device. I have suffered over the past 8 years with severe nerve pain in both legs as a result of multiple, extensive back operations for osteoporosis & have 4 spinal rods. This has required the use of a lot of medications: pain killers, Lyrica, Baclofen & heat packs & hot water bottles to enable just a limited degree of relief. Night time the pain always increased & therefore sleep was very difficult.

HOWEVER THE FIRST DAY WE PLUGGED IN OUR BLUSHIELD EMF device the severe pain was GONE! I find this almost unbelievable but it has been over 2 weeks now & there has been none of the disabling nerve pain. I will add that unfortunately it has not eliminated the heavy "pins & needles", neuropathy that I still have, but the BIG HORROR IS 99% GONE!

Both my daughter, who is my full-time carer & I fully recommend this product.

Ann, QLD

## **LESS ADDICTION TENDENCIES, MUCH MORE EMOTIONAL STABILITY**

Most people do not want to change in regards to their use of wireless devices. 'Just give me the magic needle to take my pain away, or make me fertile after years of abuse.' So when I speak about this subject, it mostly lands on deaf ears...overload is happening. However, with the several patients that bought the Blushield products, it's like witnessing a domino effect of better health

Pulses changes for the better, complexion is improved and much more emotional stability. Less addiction tendencies, it's almost as if they have had successful therapy and realized the change."

R.M.D., Dipl. Acu. (Diploma of Acupuncture)

## **ELECTRICAL SPARKS AROUND EYES GONE**

For some time I had been experiencing strange sensations around my eyes whenever I sat in front of my computer. It felt as if I was wearing huge heavy rimmed glasses with thousands of electrical sparks emanating from them – but I wasn't. Being time for my yearly check-up I visited my optometrist and mentioned my sensitivity to him. Interested but perplexed he examined my eyes and couldn't find a problem. He said my sensitivity was caused by the EMF frequencies emanating from Wi-Fi and wireless devices such as my computer and mobile phones.

I mentioned his comments to a friend who advised I purchase a Blushield device that stops the body being responsive to EMF. My friend had done an enormous amount of research and discovered that Blushield was the best on the international market. She uses it and experiences the benefits. I purchased the Tesla Gold Plug-in device from Donna and, since plugging it in haven't experienced the former discomfort.

I recommend you purchase one for your home and family.

Ashtara QLD

## **INCREASE IN ENERGY**

Already being convinced of their value to life, I purchased 6 Blushield Plugins for family and friends. Your writing and information on your website Donna Fisher added to my belief that they were a necessity in life - both to keep EMF at a distance and to heal from its effects over years. The results have been remarkable. Both I and my wife, along with a 57 year-old son, had a sudden increase in energy - and maintained it - along with changes to facial complexion that we can barely believe. This is despite my wife's situation living with Cardiomyopathy and being 79. I am 82 and appreciate my good health.

I would recommend Blushield products to anyone. In the long run they are worth the investment in health. Most people don't have this knowledge. We are fortunate.

Ken, Vic

## **NO LONGER DEBILITATED FROM EMF**

Thank you so much for sending me the Tesla Gold plugin and portable. Remarkably, I am no longer debilitated by EMF!

For most of my life I have avoided computers, phones, fluorescent lighting, long car journeys and shopping centres as much as possible. Such EMF exposure made me nauseous, dizzy, anxious and after being on my mobile I'd experience an itchy rash down the arm holding the phone. After the smart metres were installed I also started experiencing insomnia for the first time in my life, feeling extreme anxiety before bed after watching TV, worsened if my husband was also on his iPhone.

Luckily my Dad read *Light that Heals Energy Medicine Today & Beyond* and bought me a Gold plugin and portable unit to try. At first I found it even more difficult to sleep so I tried the Silver units designed for people hypersensitive to EMF. After a couple of weeks I no longer felt anxiety, I could sleep well again and take my time shopping and driving. But, I still reacted to my iPhone.

After another month getting my body used to the Silver units, I swapped them for Gold and can now use my iPhone without any nasty side effects!! I suspected my children were also EHS and have noticed since using the Tesla products, my girls sleep better and no longer throw tantrums in shopping centres or during long car journeys!

Again, thank you for spreading the word on these amazing inventions!!

Paula VIC

## **NO LONGER EXTREMELY DEBILITATED FROM EMF - Miraculous**

I suffered from severe migraines and chronic fatigue symptoms for many years. I tried everything, from eliminating foods that could be potential triggers to buying a huge number of supplements. Within two weeks of purchasing a Tesla GOLD Plug-In Home Protection device I stopped suffering from migraines and I am happy to say I now enjoy every day without feeling any cranial pressure and I have abundant energy!

Since 1973 I have been very electro-sensitive following daily radiation treatment for three months. However about 4 years ago my life turned upside down with the installation of smart meters, W-Fi/WiMAX in businesses and homes. I became very ill trying to access public buildings and public transport. I tried various shielding methods without much success. My symptoms were nonstop 24/7 with no abatement as follows:

- intense head pain on crown
- dizziness
- seizures
- hair loss
- nocturnal nose bleeds
- total insomnia
- bladder spasms
- need to urinate every ½ hour around the clock
- bedwetting
- nausea and vomiting
- neuropathy
- hand tremors
- cold sweats
- pulsing thyroid gland
- heart arrhythmias
- blood pressure dangerously high
- skin itching and redness
- breast tumors reactivated and advancing
- nails growing in corkscrew formation
- agitation

All these symptoms vanished immediately having installed a BLUSHIELD. This BLUSHIELD technology is nothing short of miraculous in my experience and I can now sleep and go about my business and drive the car again. The results were instant and a real-life saver.

Catherine, VIC

## **IMPROVED BEHAVIOUR IN CHILD**

Just writing to let you know about my positive experience with Blushield. I bought a house plug-in and personal portable device. I have a 3yr old son who predominantly woke up each morning grumpy and irritable. It was a rare occasion for him to wake up happy. However, since plugging in the house device my son has done a complete 180 and now wakes up happy and laughing 85% of time. Even his day care centre is blown away by his constant happy persona. I've also noticed both my children's skin seems to be glowing, even though it is winter. On a personal note I wear the portable device everywhere and people have commented "you are looking healthy" and other similar comments. I'm not EHS but since protecting myself I have become in tune to EMF effects. My work environment is high in radio frequency radiation. I forgot my device one day at work and I felt fatigue, tired and irritable. The difference blew me away, I thought, "wow, this is how I use to feel all the time". So thank you for this wonderful product that works. I told a friend I've mine who is EHS and she ordered a Blushield and again, nothing but positive results.

Mark K

## **HEADACHES GONE**

We started using the Blushield devices at home and Mum's 3 day headaches ceased altogether. From months and months of headaches that actually made her throw up, to nothing within a few hours and she's now been fine for several weeks since.

That is life changing for her and she is someone who has a very high tolerance for pain/discomfort.

Via Fairdinkum Radio, Australia

## **OUT OF A WHEELCHAIR AND DRIVING**

For the first 18 years of my life I lived without electricity, keeping very well most of the time. The power was connected to the house when I married at the age of 18 years. However, living in this house I never felt good, always feeling tired. I developed thyroid problems at the age of 42 years. At the age of 50 years I got very ill with a bug in the stomach, then Irritable Bowel Syndrome which I was very ill with for 7 years. At the age of 57 years I began getting a sore left foot which would come and go at first. I had treatment for it and was told it was a spur on the foot that never ever 'got really right'. I still have soreness in that foot, making it 15 years.

No doctor or specialist etc., could find anything wrong with me. They just gave up. Finally I was told I had Peripheral Neuropathy, which no treatment helped. My son was visiting regularly as he could see I was losing the battle. I had carers looking after me three times a week for two years. I was dying at that stage. I did not want to live.

Being EHS I react to everything, sleeping under a net and putting curtains up to block the microwaves. I would then react to something else. I had to purchase a wheelchair to get around the house as my foot was becoming chronically sore. I then began getting dizzy and losing my balance and feeling very ill. It got to the stage that I could not go out of the house because of the mobile phones towers and powerlines.

I had made contact with Donna again after talking with her 2 years previously. She told me about BLUSHIELD and I purchased the Tesla SILVER. I had great results with it. After about 2 months I went to the BLUSHIELD Tesla GOLD. I detoxed very badly with both of them. But now I can drive the car. I could not even sit in the back seat before. I now use the computer normally and go in the spa with it switched on.

My husband who is 86 years old has not been very well and has spent a lot of time in the house sleeping. We put the BLUSHIELD Tesla SILVER in the main house and he is now looking a lot better and coming outside, doing a few little jobs. I still have a long way to go but I have some hope now. There is no easy road back. I would like to say thank you heaps, Donna and for giving me great support as well. Thank you so much.

Daphne, QLD

## **BETTER QUALITY SLEEP, NO MORE HEADACHES or RANDOM PAINS**

I have the Blushield portable, here are the things I've noticed in 6+ months of use:

- Even though there are many reasons, this has been the happiest year for me that I can remember.
- I have NOT HAD ONE SINGLE HEADACHE since.
- I DO NOT have any RANDOM PAINS anymore. Nothing.
- I have a lot of energy and my mood is basically great all the time
- I can work on the computer as long as I care without getting pains and headaches
- My waking up process isn't a total hell anymore. I can get up without tremendous effort.
- I don't wake up at night at all from what I can tell – I sleep like a rock. I don't snore. I don't change position much at night.
- I can breathe very well, I don't get exhausted from running like I used to.

The only time I got very ill was just recently, autumn fever + sinusitis and yes, it was one of those very rare occasions I didn't have Blushield with me at that time. Funny. I believe Blushield helped a lot when I was on antibiotics (it was my last choice, nothing else seemed to help, if even that) because of sinusitis. Thank you for your amazing product.

K OjalaHelsinki, Finland

## **CLEARER MIND, NO LONGER STRESSED OUT**

I installed a Blushield in my office at the BOP Polytechnic, as my office is next door to several computer network servers with plenty of electrical fields. I was introduced to the Blushield as it was seen to reduce the stress associated with electrical fields etc. I got one and plugged it in for two weeks. It seemed to make a difference but I wasn't quite sure or convinced. To really test it, I unplugged it for a couple of weeks to see if there was any change. Over time, I started to feel snappier and more irritable. I also felt it was harder to focus on my work. After the two weeks were up, I re-installed it. It took a day or two, but my mind cleared and I no longer felt stressed out, and it has been good ever since!

I'm not going to unplug it any time soon! I definitely recommend the Blushield!

B Bullas, New Zealand

## **PROFOUND CHANGE IN ROOM**

My work in a professional video production involves me spending long periods surrounded by electrical appliances, computers and industrial VCR's etc. In addition, my office is right next door to a cell phone transmitter tower. Last year I was becoming increasingly fatigued and was suffering from a loss of concentration while working. A business associate and friend suggested that electrical fields could be a factor and that a device called a "Blushield" may be worth trying. A Blushield was duly installed in my office. Ten minutes later I suddenly realized there had been a profound change in the atmosphere of the room. From a vaguely 'prickly' feeling the air-conditioned room had somehow become fresher feeling.

M Maunder, New Zealand

## **ASTHMA GONE, MORE ENERGY, LESS STRESS**

Your Blushield works wonders.

I come to know your products from my friend who is a club lifeguard. At first, I was skeptical, however I am now convinced. My wife suffered asthma for some twenty years, now she doesn't need an inhaler at all. All symptoms related to asthma are now completely gone. Her doctor was surprised; we did not tell him it was due to Blushield, for fear of being ridiculed. I also feel more energetic, some days I was even able to lift weights at my gym club even when I had only slept for a few hours the previous night.

My staff are feeling more relaxed and are not as stressed out as before. Thanks to your wonderful device. I have recommended Blushield to my uncle and aunty who are having health problems. I will definitely introduce others to your wonder product. The money I spent is well worth it, and the cost is very reasonable.

Victor Tan, Singapore

## **SHORTER MIGRANES, BETTER FOCUSED CHILDREN, BETTER SLEEP, BETTER BREATHING**

My husband and I have migraines easily but ever since we received the Blushield Portable, the migraines come and go faster than expected. My mother-in-law had commented that the Blushield had made her sleep better throughout the night and my friend had also mentioned that even though he had only few hours of sleep, he still wakes up feeling better and not as lethargic as before. My friend's sons are 2 hyperactive kids, but the teacher had commented that they seemed to have better focus during classes now. I put the portable near my toddler during her sleep and found out that perhaps it is too strong for her. So I changed to a Mini and noticed she was able to sleep better throughout the night. She used to have some kind of breathing problem, now it has reduced a lot. We realised that all Blushield models had the effect of boosting the sound effects and enhancing music of any kind. Especially when we play techno songs, the bass is much more enhanced and significant.

C Adora, Singapore

## **LEG CRAMPS MOSTLY GONE, MORE ENERGY**

We just launched another shuttle tonight and I went through an evening of stress without “going down the tubes”. (I still have energy and am not tired). There is still some effect on me from the EMF in these areas but the improvement in the last two days is amazing. The first day I noticed that the leg cramps were mostly gone.

D Watkins, JPL, NASA

## **THE BODY IS IGNORING EMF**

It appears that the body is responding to the Blushield allowing the body to ignore more stressful environmental frequencies emitted from electrical devices, including mobile phones.

Dr WJ Rea, Texas, USA

## **STORM OF PAINFUL SENSATION HAS ABATED**

I live in a building with a cell phone tower on the roof, I was unable to sleep because of this. It was like a fatigue was overtaking my entire body. Once I received the Blushield portable and plug in, I immediately implemented them. Now I am feeling much better and am able to sleep in my apartment for the first time in a week. I was able to sleep for more than five hours. I also notice an instant difference if I step out of range of the portable when I am at work.

It's like a storm of painful sensation has abated. Many thanks for the great product and all your help.

A Hayward, Saudi Arabia

## **MORE RELAXED, MORE BALANCED, IMPROVED CONCENTRATION**

### **ANIMALS NOTICED BLUSHIELD**

I am electro-hypersensitive and I have tried other portable devices and also stones but they didn't work for me. With the Blushield I feel more relaxed and balanced and it improves my ability to concentrate.

What really fascinates me was the reaction of my horse and ponies when I first had the device on me. I put my horse in the meadow and was arranging her hay, but she kept a few meters distance and had this strange, investigating look in her eyes. Normally she starts to eat right away. Then she came towards me and put her nose to my pocket where I had the Blushield. She stood there for a few seconds before she started eating her hay. Then I put my two ponies in the meadow and they usually run away when I let them go, but they kept standing with me and also put their noses to my pocket. So clearly they feel the Blushield and find it pleasant. Horses are flight animals so if they don't trust something their first instinct is to run away.

I recently also went to a family to measure EMF with my Gigahertz HF-meter. The woman I spoke with mentioned that their dog was less hostile to me than to other strangers. So I think that also must have been because I was carrying the Blushield.

The reason I noticed that the battery was flat was actually that I started to forget my Blushield and I even couldn't find it last Sunday. I normally never forget it, which also is an indication for me that it works. Other devices that I had and stones I forgot to take with me all the time.

H Vercammen, Holland

## **AUTISTIC CHILD MASSIVELY IMPROVES, COMPLETING TASKS, NOT LASHING OUT**

I bought a Tesla Gold plug in at the Bio Balance conference in March 2015 and oh my goodness, how it has changed our life.

My little boy has autism and for several years now he would only sleep a maximum of 4 -5 hours per night, even though he was taking 6mg of melatonin. Our doctor suggested many things to help including Epsom salt baths and aroma therapy, but Adam wouldn't sleep.

My child seemed grumpy, aggressive and extremely unhappy all the time. Huge meltdowns were a regular thing in our house and it created a lot of stress within our family.

On the first night after plugging in the Blushield Tesla Gold model for our home, my son slept for 10 hours and the next morning he woke up smiling and playful. At first I thought it's just a coincidence but NO it's REAL.....we've had the same results every day since.

This prompted me into buying the Tesla Gold Portable so that my son is protected all the time. Adam is now happy, playful and even learning better at school. His teacher is amazed at this new and improved boy who now can sit and complete a task without lashing out and hitting other kids. It has also greatly improved the quality of our family life at home.

I am forever grateful to meeting Sally and for her introducing me to these great products and I've shared this with a couple of our friends and they also got immediate results with their families.

## **INSOMNIA DISAPPEARED, FEEL A LOT CALMER, MORE POSITIVE CHANGES IN OUR DIGESTION**

As a Nutritionist and GAPS practitioner I am very aware of doing everything right for our family's wellbeing, in terms of diet, exercise and avoiding toxic chemicals. We get plenty of good fats, no trans - fats, no processed foods, no processed sugar, and nutrient-dense home cooked meals. We use no toxic chemicals in hygiene products and no chlorinated tap water. Our food is home-grown and organic. We were doing everything right but some of us still had some nagging health problems. Why? Because electromagnetic radiation (EMR) was something I had not paid much attention to. So I did my research in this area and came to realise that EMR could be affecting our health. The health challenges we were still experiencing were insomnia, anxiety, kids coming home from school grumpy and unmotivated. Also working on healing family members' leaky gut with the GAPS protocol was slower than the expected time frame.

After reading that a growing number of the population is experiencing a range of subtle to serious symptoms, which they attribute to EMR, often termed "electrical sensitivity." Frequently reported symptoms included headaches, nausea, exhaustion, "burning" skin, dizziness, inability to concentrate, agitation, heart palpitations, anxiety, insomnia, tinnitus, chronic fatigue, joint pain, swelling of face and neck, eye problems, rashes, Alzheimer's, diabetes, psoriasis, insomnia, cancer, leukaemia and ADHD. I became more aware that I needed to protect our family from EMR exposure as best I could. My husband Lincoln met Sally Thompson though our common interested in nutrition and children's health. We purchased a Blushield Tesla Gold plugin for home, and Tesla Gold portables for us and our children while they were at school, as well as the Air-Tube headsets for use on our mobile phones.

It took about 2 weeks for us to notice some differences; my insomnia disappeared from one day to the next. We all felt a lot calmer, the kids come home ready to play outside and happy to do their homework. We have used the protection devices now for 2 months I have noticed more positive changes in our digestion. I believe this is due to that our healthy gut bacteria has a better chance of surviving when it is not constantly exposed to radiation.

## **PAIN IN HEAD AND EARS GONE**

Words cannot describe what Blushield has done for me.

I am the head of security in a major Sydney shopping centre and as such, am required to carry 2 mobile phones, and a walkie talkie at all times. As you can imagine, on a day to day basis I am surrounded by not just the EMF from the countless wi-fi connections and mobile phones within the centre, but also the effects of the fluorescent lights.

I was experiencing very bad headaches on a daily basis, with middle ear pain that I noticed seemed to get worse every time I used my mobile phone and held it up against my ear.

In an effort to reduce the pain and headaches, I began using a standard ear piece, to no avail and then tried to use my mobile on speaker phone. That only made the pain worse and I began to get noticeably more annoyed and angry with each call.

I saw my Doctor in Marrickville and after explaining the situation, was referred for an x-ray. The results seemed to show signs of sphenoid sinus. I was advised to use a nasal spray and told the pain would subside eventually. Unfortunately though, every time I used my mobile I kept experiencing the pain in my head and ears. It was unbearable.

After a second appointment, the doctor then suggested I ring Sally from EMF Protection Australia to try the Blushield products. It's claimed that the Blushield products over-ride all harmful man-made EMF. Even though I didn't fully understand how the technology worked, I was becoming so sensitive to the side-effects and wondering how I would ever be able to keep doing my job, I decided to give them a try.

Sally was very helpful and advised me what would best suit my case, recommending an Air-Tube headset, a Tesla Gold plug-in for my home and a Tesla Gold portable device to carry on me whenever I left home.

The first day I used the air-tube headsets, was a Friday and I was so impressed because I didn't get the usual pain in my head and ears! By Monday, the pain was fully gone. Amazing! I'm so grateful to Sally and Blushield. I would recommend any one who struggles to live in our modern world with all of this technology, to call her. This stuff really works, its changed my life around.

Fay Awad, NSW, May 2015

## **MORE POSITIVE MENTALLY, MORE ENERGY**

From Chronic Fatigue to feeling energised and enjoying life again. As a busy mum of three and small business owner, I was struggling with feeling constantly exhausted. Every day became a major effort just to function, to the point of being unable to get out of bed in the mornings. I've always been passionate about health and mindful of eating organic wherever possible and we grow most of our own produce on our little property. I thought I was doing a pretty good job at living healthy but I just couldn't seem to improve. I worried if I was feeling this way in my 40's how was I ever going to cope as I got older? My doctor diagnosed me with Chronic Fatigue and I commenced a supplementary regime to help detoxify. This helped marginally, but I found myself increasingly listless and couldn't seem to think straight. I'm sure my husband and kids thought I was going mad!

At one of my next appointments, my doctor mentioned that she'd recently attended a medical conference and found out about some products that helped overcome the negative effects of radiation from mobile phones and wi-fi. etc. She suggested I call Sally.

I ordered the Tesla Gold Plug-in for our home and a Tesla Gold portable to take with me when I was out, plus the Air-Tube anti-radiation headsets. I received my order the next day and well....over the next few days I started to detox! Sally had warned me that this may happen, so I wasn't totally surprised. It still wasn't pleasant though! For the next couple of weeks I was even more tired if anything, but I'm glad I persevered, hoping that I'd feel a whole lot better when I was through the other side of it. Thankfully, that's exactly what happened. I now have much more energy and I'm back to being so much more positive mentally. I feel like I'm in my 20's again. It turns out my favourite part of the day is early mornings! I wake up feeling refreshed and sneak out of bed while my husband and kids are still sleeping to enjoy some time to myself before my busy day starts. I can't recommend the Blushield products any higher. My passion for living life has returned. *Chloe K, Bangalow, May 2015*

## **REGULAR SEIZURES STOPPED apart from OTHER STRESSORS**

I have had epilepsy most of my life and although no longer have major seizures I was suffering from regular partial seizures. This was like jolts in my head which were sometimes bad enough to interrupt speech. Sometimes it would happen intermittently for an hour, sometimes for many hours leaving me feeling exhausted. I always felt I was sensitive to EMFs. My skin would prickle and I'd feel kind of weird if I stood in front of a microwave or when I drove past cell phone towers. I have tried various devices with no result but Blushield looked very promising so I invested in the Tesla Gold plug-in and portable.

The result has been amazing. I never went more than a few days without some kind of seizure activity. Now it has almost totally stopped and I only have occasionally when other triggers happen such as severe stress or being exposed to flickering or flashing lights. One morning recently my head was really jerky and there had been no trigger I could think of.

After a few hours I noticed the Blushield was sitting on the kitchen bench. A visitor the day before had used the power point to plug in their phone charger and not plugged it back in. This device has made such a difference to me and I wouldn't be without it now. I was a bit worried I would always be replacing the battery in the portable, but I have had it for a year and a half now and frequently forget to turn it off when I come home and the original battery is still going strong. I'm so grateful that I came across Blushield and really appreciate all the research Earthing Oz did to be certain it lived up to its claims before they sold it.

Louise, WA

## **MIGRAINES GONE**

I suffered from severe migraines and chronic fatigue symptoms for many years. I tried everything, from eliminating foods that could be potential triggers to buying a huge number of supplements. The headaches continued and prompted me to search for answers on the internet. I discovered information about EMF and the damaging neurological effect of being in front a computer for excessive periods of time. Within two weeks of purchasing a Tesla GOLD Plug-In Home Protection device I stop suffering from migraines and I am happy to say I now enjoy every day without feeling any cranial pressure and I have abundant energy!

N Brown, QLD

## **IMPROVED CLARITY OF THOUGHT**

### **LESSENING OF SYMPTOMS**

### **INCREASE IN ENERGY**

### **DETOXING OF BODY**

### **SILKY GLOSSY HAIR**

I have found the Blushield Tesla Gold plug-in a huge support for my body. I have found improved clarity of thought, lessening of symptoms on EMR exposure, increase in energy, detoxing of body and another plus is the most silky, glossy hair I have had in decades. The portable provides added support when out in traffic and exposure in shops, car, etc. Donna, you need to get someone to do some vegetable trials, my plants are loving the Blushield. I have purchased one for each of my children I am so impressed.

Sue, NSW

**NO LONGER FEELS CONSTANTLY ANXIOUS AND AGITATED  
NECK AND SHOULD PAIN HAS ALL BUT DISAPPEARED  
NO JAW PAIN FROM CLENCHING TEETH IN SLEEP  
DREAMING FOR THE FIRST TIME IN YEARS  
WAKE UP REFRESHED  
EIGHT YEAR OLD'S TRANSFORMATION IS EQUALLY AS AMAZING.  
HAPPIER WITHIN HIMSELF and NO LONGER WAKES UP CRANKY AND CRYING  
TANTRUMS HAVE STOPPED  
STARTED SPEAKING IN SENTENCES AND PARAGRAPHS  
SHORT TERM MEMORY IMPROVING  
TEACHERS BLOWN AWAY BY INCREASING ABILITY TO STAY ON TASK  
MOTOR SKILLS IMPROVING**

Hi, my name is Sally Thompson and I'd like to share with you both my and my son's experiences with the BLUSHIELD Tesla Gold plug-ins and portables. To give you some background, my son who turns 8 years old next month has had a very tumultuous few years with his health. Ezra began having seizures when he was 3 years old. Some days he had up to 40 per day and 5 different medications failed to stop them. This went on for over 3.5 years. The combination of the seizures and medications all but wiped his short term memory and he was diagnosed with global developmental delays. (It is very hard to learn with no short-term memory)!

Prior to the seizures and side effects from the medications, Ezra was able to count up to 20 and back, and form letters and numbers like an average child of his age. All of that was lost and he became extremely reluctant to even pick up a pencil, knowing that he couldn't do what he was being asked to do. He would also regularly have tantrums and sometimes be aggressive to his school friends. I found this part of his behaviour heart-breaking, because at other times he could be such a sweet child. His concentration span was also very short.

With the help of an exceptional and cutting edge medical support team, (Bio-Balance) we pursued a more natural approach to controlling his seizures. By balancing his bio-chemistry and commencing the ketogenic diet, we were finally able to stop the seizures. Thankfully Ezra has been seizure free now for 20 months, is off all of his medications, and his successful case is being written up in the US Medical Journals.

As a single mum, it was an incredibly stressful time and as I was his full-time carer, I was virtually unable to earn a living during those years. I have always been ultra-sensitive to different energies and over the last 10 years had searched for ways to combat the effects I was feeling from mobile phone radiation, too much time spent on my computer editing photographs, and the effects of the fluorescent lights etc. None of the things I tried bought me effective relief. I am so sensitive that there are even some cars that I cannot ride in because the energy coming from the engine makes me feel sick. I was

also devastated to learn that the estate we were living in was the pilot estate for smart meters in Queensland.

Even after Ezra was no longer having seizures, the constant feeling of anxiety in the pit of my stomach, never left. My fuse had become so short, that I really did not like the person I was becoming. I would often wonder what had happened to my old sweet natured self, and who was this constantly agitated person?

It wasn't until I attempted to return to work that I finally realized the full implications of being EHS. (ElectroHyperSensitive) Just one mobile phone call or session in front of my computer would completely wipe me out and I would have to sleep for hours to semi-recover. Frequently I would wake up so exhausted in the morning, that I would struggle to get out of bed and we would often be late for school. Ezra was recovering, but my health was deteriorating big time.

I'll always be eternally grateful that one day my research led me to Donna Fisher's website and I found out about these incredible BLUSHIELD Tesla EMF protection devices. They have been absolutely life changing for both Ezra and I.

I no longer feel constantly anxious and agitated, and my neck and shoulder pain has all but disappeared. I also haven't had any jaw pain from clenching my teeth in my sleep. If I choose, I can work long hours and I am sleeping so deeply that I'm dreaming for the first time in years. I actually wake up refreshed!

Ezra's transformation is equally as amazing. He is noticeably happier within himself and no longer wakes up cranky and crying. The tantrums have stopped. He's started speaking in sentences and paragraphs instead of struggling to find words and repeating the same word over and over whilst trying to finish the sentence.

The sound of him singing and remembering lyrics makes my heart smile and he is starting to be able to hold a beat to the music. His short term memory is improving and a couple of weeks ago he woke up and repeated 5 lines of the banter between 2 movie characters, without skipping a beat.

His teachers and learning support team are blown away by his overall improvement and increasing ability to stay on task. Ezra is so proud of himself now that he's bringing home stickers for good behaviour.

Ezra's motor skills are improving as well. He actually wants to write and draw and has started using cutlery of his own accord instead of eating with his fingers. Last week he played his first ever game of handball during his lunch hour. And guess what...? We actually arrive to school on time.

I whole heartedly recommend the BLUSHIELD Tesla products.
